Today's Agenda

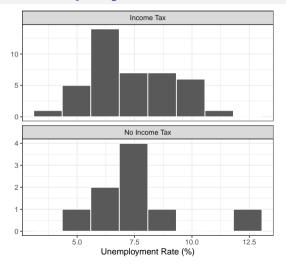

Practice building and polishing univariate, bivariate and multivariate visualizations

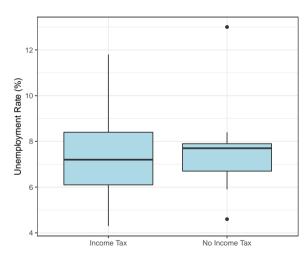

Justin Leinaweaver (Spring 2022)

Practice from Tuesday

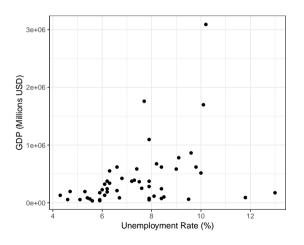

- Make two histograms of unemployment, one for states with an income tax and one for states without.
- Remake the above as a box plot
- Make and analyze the following four scatter plots:
 - GDP (actual) x Unemployment
 - GDP (actual) x Bachelors' Degrees
 - GDP (rate) x Unemployment
 - GDP (rate) x Bachelors' Degrees

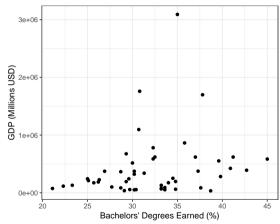

Unemployment x Income Taxes

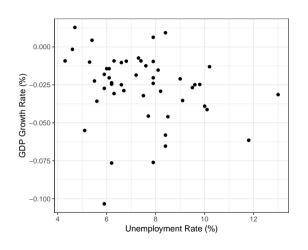

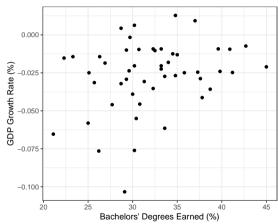

Scatter plots of GDP (actual)

Scatter plots of GDP (rate)

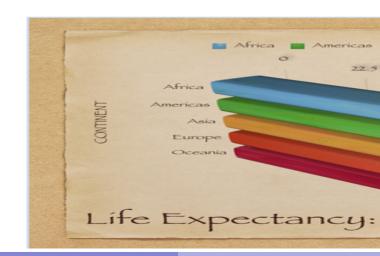

Knaflic, C. (2015). Choosing an Storytelling with Data: A Data V. Business Professionals. Wiley.

Professional Visualizations

- Informative titles
- Figure labels
- Clean axis labels
- Source info
- No chart junk

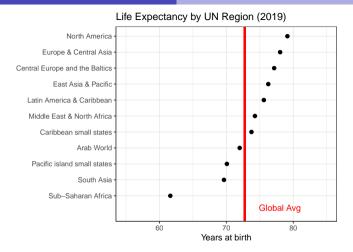

Figure 1: Global life expectancies for 2019 are taken from the World Bank's World Development Indicators (WDI) database and organized by UN region.

Univariate Analysis

Visualize the following variables:

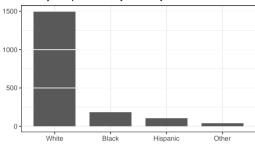

- Ethnicity
- Education
- Yearly Income (earnk2021)

Univariate Analysis

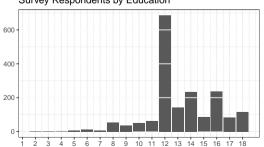

Visualize the following variables:

- Ethnicity Bar plot
- Education Bar plot
- Yearly Income (earnk2021) Histogram

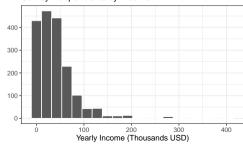

Survey Respondents by Education

Survey Respondents by Income

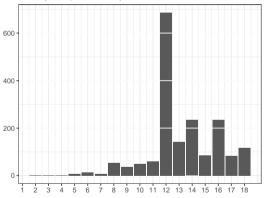

Univariate Analysis

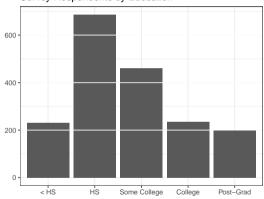

Recode education and remake the visualization:

- < HS (1-11)
- HS (12)
- Some college (13-15)
- College (16)
- Post-Grad (17-18)

Survey Respondents by Education

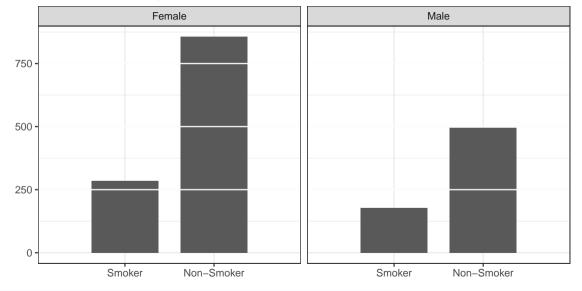

Bivariate Analyses

Visualize the following relationship:

Gender x Smoker

Reported Smoking Rates by Gender

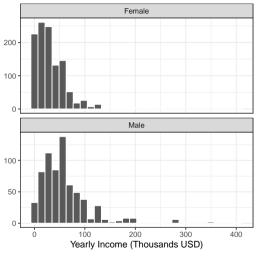

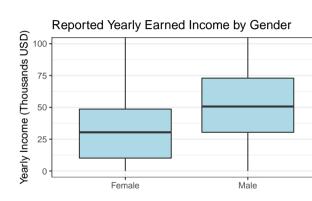

Bivariate Analyses

Visualize the following relationship:

Income x Gender

Reported Yearly Earned Income by Gender

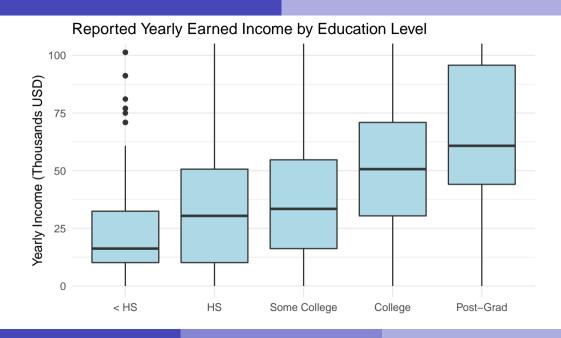

Bivariate Analyses

Visualize the following relationship:

Income x Education (recoded)

Multivariate Analyses

Visualize the following relationship:

Income x Education (original) x Gender

Multivariate Analyses

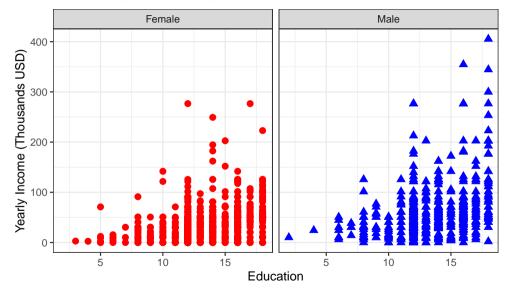

Visualize the following relationship:

Income x Education (original) x Gender

Make two scatter plots

- Income x Education for males
- Income x Education for females

Does education correlate with income?

Multivariate Analyses

Visualize the following relationship:

Height x Weight x Gender

Basic Demographics of the Survey Respondents
